

**CaribSea**  
Bringing Science to life

caribsea.com

New in this Catalog!

**Page 1** Reptilite™ Brites, Five hot colors, that will blow your mind.

**Page 2** Moonlite Glo-Rocks and Full Moon™ glow-in-the-dark sand. Fun all day, and all night.

**Page 6** Super Naturals™ Essentials, five new all natural colors and textures that will shake things up.

**Page 8** All hands on deck! The A.R.K.™ sailed in September, are you on-board?

**Page 9** Super Naturals™ Rock Stars bagged rock in nine awesome types. Are you ready to rock? Also check out the new Bagged Reef Rock and South Seas Base Rock in ten pound net bags!

**Back Cover** A care sheet tease from the upcoming launch of the all-new CaribSea Brands website.

**Back Cover** Special dealer offer and dealer support products!

## About our Brands

### My Earth Pet

In 2008, My Earth Pet was launched after developing one of the most amazing small animal litters in the history of the industry, and no... We are not exaggerating!  
[www.myearthpet.com](http://www.myearthpet.com)

### Blue Iguana Brand

Launched in 2004, Blue Iguana Brand products have rapidly become a trusted name in the world of herpetology. With truly unique and highly effective products, Blue Iguana Brand is setting new standards in the industry. We support the IRCF ([www.IRCF.org](http://www.IRCF.org)) to help save endangered reptiles all over the world.  
[www.blueiguana.com](http://www.blueiguana.com)

### CaribSea

Since 1972 we have supplied public aquariums, zoos, aquaculture facilities, public and private institutions, and hobbyists all over the world with the highest quality products in their category. In fact, CaribSea is one of the most trusted names in the industry.

**Coco Fresh™** - The new science of litter. CaribSea is the leader in probiotic substrates, and we are thrilled to introduce Coco Fresh™. Coco Fresh™ uses natural microbiology for unsurpassed odor control. Coco Fresh™ is different. There is not just a small difference, its not just better than what is already out there, it's amazingly better. Coco Fresh™ naturally eliminates odor, it doesn't just cover it with smelly perfumes. Plus, this product is truly green. It is completely biodegradable, organically processed, and does not harm any trees in its production. Coco Fresh™ doesn't have any timber or even timber by-products, no resins, nothing artificial. Seeing, or rather smelling, is believing. Use it once, and you'll become a Coco Fresh™ believer too.

**Reptilite™** - An all natural calcium substrate; ideal for true chameleons or any tortoise, snake, lizard, arachnid, or insect that comes from an arid or semi arid environment. The naturally spherical grains won't scratch your valuable animals inside or out! There are no artificial dyes or chemicals in Reptilite™. This low impact substrate also contains strontium and magnesium while being free of silica and phosphates. Though not intended as a food source or supplement, it is 100% edible and easily digestible. In fact, Reptilite™ is made of aragonite, the most soluble form of calcium carbonate available. Reptilite™ also contains naturally occurring strontium, which recent research indicates may increase bone density. Trusted by professional reptile breeders and hobbyists alike.

We're full of **BRITE** ideas!

**Moonlite Glo-Rocks™** - have fun day or night, these rocks look completely natural in daylight, but in darkness (after being charged) or under black light they glow an eerie green!  
 2.5 lb. Net bag #00308  
 5 lb. Net bag #00307

**Full Moon** - Glow in the dark sand for reptiles will give you the night life you've been looking for! Full Moon glows in the dark, giving a unique look to desert reptile enclosures once the lights are out. This low impact, fine grade sand is ideal for bearded dragons, adult leopard geckos, uromastix, and other desert reptiles. Fun for scorpions and other arachnids too. It's especially cool when combined with Moonlite Glo-Rocks, real fossil rocks that glow. Light up the night!  
 5 lb. #05800

**Coco Soft™** - Your best value. Coco Soft™ smells fresh up to 3 times longer than other reptile bedding by eliminating odors naturally, not simply masking them with perfumes or aromatic oils. Coco Soft™ becomes a living substrate that functions like a forest floor ecosystem with up to 20 times the biological activity of other brands. Coco Soft™ begins with fresh 100% organically grown coconut husk, never fermented in saline water. In fact Coco Soft™ has been demonstrated in a major university study to reduce the growth of pathogenic fungi by up to 77%! These same microorganisms quickly reduce organic waste, keeping the enclosure cleaner and smelling fresh, even on a heavy feeding schedule. A cleaner cage means a healthier pet. We make 3 different grades for your convenience.

**Voodoo Wood™** - is collected deep in the bayous of Louisiana. It is especially ideal for reptiles and amphibians as it lacks the salt contamination of coastal collected driftwood and is easy on sensitive skin. Each piece of Voodoo Wood™ is unique. The long, slender shapes help to give height to your ecosystem and offer your reptile and amphibian friends a more realistic environment so they feel secure and safe. Voodoo Wood™ will absorb water naturally to help maintain humidity.

Small #00301  
 Large #00302  
 Jumbo #00303

**Total Turtle™** - Finally, the perfect substrate for aquatic turtle care! Your choice of our Coarse grain size for under gravel filters, or our Fine grade for external filtration (great for mud dwellers too!); both complete with beneficial calcium. Total Turtle™ provides pH support to prevent water from becoming too acidic, and has superior enhanced surface area for supporting water purifying bacteria. Total Turtle™ will give you a healthier, happier turtle!

Total Turtle™ Coarse  
 10 lb. #01842

Total Turtle™ Fine  
 10 lb. #01841

**Cal-Stron™ and Cal-Stron™ with D3** - Contain naturally occurring strontium carbonate, and are more digestible than oyster shell or calcite based reptile calcium. Cal-Stron™ is phosphorous free and made from pristine coral sands. Because of Cal-Stron™'s ultra smooth texture and 10 micron size range, it not only sticks well to food items, but mixes well with drinking water too. Both Cal-Stron™ and Cal-Stron™ with D3 are available in 6 oz. jars or our new packets. Cal-Stron™ packets offer all the benefits of Cal-Stron™ in an easy to use single dose packet. Available in either a 25 packet consumer pack, or a 200 count counter top display. Each 2 gram packet is labeled and marked with it's own UPC code for easy counter sale. One packet treats up to 100 crickets.

**Desert Bone™** - Rock is an all natural alternative to plastic reptile enclosure decorations. Made of pure calcium carbonate, Desert Bone™ Rock offers a more textured surface than plastic, and can aid in shedding by giving the reptile something to rub on just like in the wild. Each Desert Bone™ Rock is unique, and its natural holes and crevasses give reptiles a variety of hiding places. Desert Bone™ Rock will also gently absorb heat from sunlight or artificial lamps, and slowly release this heat over time just like in the desert. Your reptiles can find familiar, comfortable refuge in this unique, natural rock.  
 Small #00310  
 Large #00314

**AragaMight™** - "The 10 micron miracle," is a revolutionary product that puts the power of aragonite in a ultra-high surface area powder. This product is ideal for African Cichlids, livebearers, and any marine aquarium. Pure aragonite, ground to 10 microns for maximum surface area, AragaMight™ provides flash mineralization of purified water with no 2 parts to mix. This non-caustic powder supplies calcium and carbonate, as well as a full suite of natural trace elements, all without any ionic residual or by-product of any kind. How? Aragonite is what your corals are made of, nothing more and nothing less.

12 oz. #12520  
 16 oz. #00520  
 50 lb. #00550

**Aragamilk™** - The perfect alkalinity booster because... Aragamilk™ has a full pound of buffer in every 16 fluid ounce bottle. This buffer comes in two forms: bicarbonate for immediate response, plus carbonate from aragonite. This second form makes for a safer, time-release buffer, over 2-3 days, for long term security without the wild pH swings that can stress your tank inhabitants. Great for your African Cichlid or livebearer aquariums too. You'll notice it will stop downward pH swings so common in large fish only marine and Cichlid set ups helping you create an environment for happy, healthy, and more colorful fish!

4 oz. #04521  
 8 oz. #08521  
 16 oz. #00521  
 1 gal. #01521

**BioMagnet™** - Cloudy water is caused by fine suspended particles such as algae, silt, and bacteria. These particles usually carry a negative charge as does most filter media. The filter media, therefore, repels these particles and water can remain continually cloudy. BioMagnet™ imparts a positive electrical charge as a bacterial attractant. This unique formula quickly seeks out and encapsulates the suspended particles, enabling the positively charged particles to be drawn to the filter. Particles caught in the filter are broken down by bacteria, and suspended bacteria are now repositioned onto strata where they are most efficient. The result? Crystal clear water, fast... and a better biological filter!

8 oz. #08524  
 16 oz. #00524  
 1 gal. #01524

**BufferPlus™** - is the easy way to buffer and re-mineralize marine and reef aquariums. Now BufferPlus™ has been reformulated to be a superior alkalinity booster. In its new dry form BufferPlus™ still has the stable buffering always associated with aragonite buffers but also has double the alkalinity boosting power to get your alkalinity where you need it when you need it. BufferPlus™ new formula also makes it ideal to use with ionically imbalanced supplements such as those that contain calcium chloride. BufferPlus™ also contains calcium and trace elements such as strontium, and magnesium for robust and vibrant corals, and invertebrates.

6 oz. #06522  
 16 oz. #00522

**AmmoBuster™ Extreme** - is the one step water conditioner that does it all! AmmoBuster™ Extreme will not only eliminate ammonia, chlorine and chloramine, but detoxify heavy metals, even copper, as well. At the same time, AmmoBuster™ Extreme will replace a fishes protective "slime coat", add essential electrolytes, boost alkalinity, and reduce fish stress. AmmoBuster™ Extreme even neutralizes nitrite! AmmoBuster™ Extreme is ideal for handling high ammonia levels in newer aquariums where the waste reducing bacteria populations are not yet adequate.

8 oz. #08535  
 16 oz. #00535  
 1 gal. #01535

**AquaBiotic™** - This product is an all natural formulation consisting of a suite of beneficial waste reducing bacteria strains (aerobic and anaerobic) designed to reduce the need for water changes and gravel cleaning duties in fresh or saltwater aquariums. With regular use, AquaBiotic™ minimizes toxic ammonia, nitrite and nitrate waste as well as noxious odors by eliminating excess food and fish waste. Its aquarium maintenance in a bottle!

8 oz. #08536  
 16 oz. #00536  
 1 gal. #01536

**AquaBiotic™ Botanical** - This advanced freshwater aquarium product contains liquid barley straw extract, beneficial waste reducing bacteria and enzymes for a total eco-systemic approach to aquarium maintenance including high water clarity. Use on a regular basis for excellent results with delicate freshwater aquatic life such as invertebrates, plants and soft water fishes.

8 oz. #08537  
 16 oz. #00537  
 1 gal. #01537

**Eco-Complete™ Cichlid** - In the hustle and bustle of today's world, many of us simply don't have time to wait, and wait... That's why busy professional, and eager beginning aquarists alike appreciate the benefits of Eco-Complete™ Cichlid. They enjoy the fact that after all of that careful and patient planning - they can forgo another 4 to 8 weeks of practicing patience as the break-in cycle will now be complete in days, not months. Both mineralogically and biologically complete, Eco-Complete™ Cichlid maintains the high pH that African Cichlids need while helping to resist pH drops associated with Cichlid systems, therefore eliminating the constant addition of chemicals. It buffers automatically for the life of the aquarium and adds calcium, magnesium, carbonate, and more! The unique composition recreates the African Rift Lake environment. Eco-Complete's™ high internal porosity maximizes biological capacity, which keeps your fish healthier. Eco-Complete™ Cichlid Substrate contains live, water purifying bacteria that makes cycling a new aquarium faster and safer. No rinsing required! Eco-Complete™ is packed in a water conditioning solution for immediate results! Eco-Complete™ Cichlid comes in 5 beautiful types, all in 20 pound bags. (each type is pictured life size on bottom of opposite page). Loved by aquarium installation and maintenance companies for it's clean low-mess ready-now capabilities combined with lightning-fast break-in time; add this with Ready-Water™ and you can start enjoying fish in your new setup as soon as you have aerated the water and adjusted the temperature.

**African Cichlid Mix™** - CaribSea's African Cichlid substrates can help recreate a variety of environments. Rift Lake Authentic™ is a typical Mbuna setup while Sahara Sand™ is ideal for nesting featherfins. The African Cichlid Mix™ Original is great in just about any application! The bold colors of all the Cichlid Mixes encourage the vibrant, natural coloration of your fish. CaribSea's Cichlid products naturally buffer for the life of the aquarium simplifying the process of matching water quality parameters to the Great Rift Lakes of Africa. African Cichlid Mixes™ also resist the eventual downward drift of pH in long established or crowded systems. Seasoned hobbyists and beginners alike appreciate the ease of maintaining water quality as much as the beauty of these substrates.

**Eco-Complete™ Planted** - Why does Eco-Complete™ planted aquarium substrate outperform other products? For the same reason that Hawaii, Bali and Costa Rica are famous for lush, exuberant plant growth. The secret lies in rich basaltic volcanic soil which contains iron, calcium, magnesium, potassium, sulfur plus over 25 other elements to nourish your aquatic plants. Eco-Complete™ Planted Aquarium Substrate is mineralogically and biologically complete, giving you luxuriant aquatic plant growth without nuisance algae! Iron rich Eco-Complete™ eliminates the need for laterite. No artificial dyes, paints, or chemical coatings. Eco-Complete™ has highly porous spherical grains for optimum diffusion performance and contains live Heterotrophic bacteria to rapidly convert fish waste into natural food for your aquatic plants. It establishes a natural biological balance which makes cycling a new aquarium faster and safer.

New formula for enhanced root development!

**ReefCal™** - is a 100,000 ppm ionic calcium solution. ReefCal™ will raise calcium levels by just over 5 ppm per capful (5ml) per 25 gallons of water. Use a good quality test kit to monitor dissolved calcium levels in the aquarium. ReefCal™ should be used with a buffer like BufferPlus™.

8 oz. #08533  
16 oz. #00533  
1 gal. #01533

**PurpleUp™** - uses a unique dual method approach to coralline algae acceleration. This approach is so unique that PurpleUp has been awarded a US patent (US patent No. 7,565,883). It contains ionic calcium; which immediately raises dissolved calcium levels in your aquarium water. At the same time Super Sea Calcium™ (a 10 micron aragonite powder derived from natural seawater) targets the live rock surface. This dissolves in situ; delivering calcium, strontium, magnesium, and carbonate right where it's needed. PurpleUp™ also replenishes iodine; an essential element for coralline algae tissues that quickly becomes depleted in closed systems. PurpleUp™ is not a fertilizer, it does not promote the growth of nuisance algae.

4 oz. #04530  
8 oz. #08530

1 gal. #01530

**D-Chlor-It™** - is your one step water conditioner that does all you need to turn ordinary tap water into aquarium safe water. D-Chlor-It™ not only neutralizes chlorine and chloramines, but also ammonia, heavy metals, even copper. At the same time, D-Chlor-It™ replaces the skin "slime coat", adds essential electrolytes, boosts alkalinity, and reduces fish stress. D-Chlor-It™ even detoxifies nitrite.

8 oz. #08534  
16 oz. #00534  
1 gal. #01534

**PhosBuster™ Pro** - has a unique patent pending formula that removes dissolved phosphates in minutes instead of days. Safe for all reef tanks, saltwater, and freshwater aquariums of all sorts. Each 8 oz. bottle removes at least 1.5 ppm in up to 250 gallons of water! No more fiddling with filter bags or special reactors; just dose it and forget about your phosphate problem. PhosBuster™ Pro may be used regularly as part of a preventative maintenance program.

4 oz. #04508  
8 oz. #08508  
16 oz. #00508  
1 gal. #18508

**Ready Water™** - Start your aquarium on the right foot and be certain that you are making your planted aquarium water changes with the best quality water possible. Ready Water™ is purified de-ionized water with added minerals in precise proportions plus added wide spectrum water conditioning capacity. It's an aquarium tune up every time you use it!

2.3 gal. #00922  
4.4 gal. #00944

**Sea-Pure™** - is real seawater and contains all the major and minor trace elements found in natural seawater in correct proportions and at the proper pH. No potentially harmful pathogens. No nitrates or phosphates, no harmful organics, no artificial preservatives or chemicals. Stop wondering if your salt mix lives up to real seawater. Stop worrying about harmful impurities in your tap water. Sea-Pure™ is simply seawater as nature intended.

2.3 gal. #00622 - 2/cs  
4.4 gal. #00644 - 1/cs

**Instant Aquarium™** - Confidence in a bag. New Instant Aquarium™ takes the guess work out of starting a new tank. The Instant Aquarium™ line offers a variety of finer grade natural gravels and sands water packed with living, water-purifying bacteria, state of the art clarifier, and a complete water conditioner. Tap water is all you need to get started. Instant Aquarium™ immediately begins the cycling process, eliminating new tank syndrome, and discouraging nuisance algae. Instant Aquarium™ detoxifies metals, eliminates ammonia, neutralizes chlorine and chloramines, and provides a protective slime coat for stressed fish. Instant Aquarium™ also reduces nitrates and nitrites. Starting a new aquarium has never been easier.

**Arag-Alive!™** - You can now bring the world's most exotic reefs into your home with CaribSea's Arag-Alive!™ substrates. Eight environmentally accurate ecoscapes, developed from CaribSea's cooperation with public aquariums and zoological parks where authenticity is a must, Arag-Alive!™ makes any aquarium uniquely yours. Arag-Alive!™ makes it easy to set up an aquarium. It's ready to work, clears quickly, and contains millions of live bacteria to cycle super fast and create a natural biological balance. Arag-Alive!™ suppresses the dreaded "new tank syndrome", compresses the ammonia cycle, and discourages nuisance algae. In fact, independent labs prove Arag-Alive!™ cycles days faster than other brands of live sand. That's what makes Arag-Alive!™ the choice of new aquarists and maintenance companies where speed of set up, beauty, and reliability are demanded.

**Ocean Direct™** - This substrate is different than all other live sand products on the market. Ocean Direct™ utilizes "Sea Breathe" technology, which preserves real live sand with its own original bacteria. Every breathable bag of Ocean Direct™ is alive with up to 1000 times more beneficial bacteria than other preservation methods. Every grain of Ocean Direct™ is coated with bacteria and encapsulated by capillary action in a thin film of real ocean water. The thin film is open to the atmosphere for unparalleled gas exchange. This results in high counts of natural and beneficial bacteria with no noxious buildup of metabolic by-products. Ocean Direct™ provides you with a thriving, natural aquarium in minutes!

**Dry Aragonite Substrates** - CaribSea's dry marine substrates are recognized worldwide for their purity and precision. Our substrates are purposely engineered and free of impurities such as ash, metals, pesticides, and silica; which allows you to create a safe and beautiful environment for your fish and invertebrates. Precision grading makes system design a breeze! No matter what type of system you are setting up, we have the substrate that's perfect for the filtration method and habitat you are creating.

**CORALine™** - Don't settle for an ordinary gravel. Natural dramatic colors and textures combined with pH support characterize our Coraline™ and Seaflo™ products. These are coarser materials suitable for most undergravel filtration and fish systems or as an accent for finer sands anywhere where elevated pH values are desirable. Consider the Coraline™ products in brackish or Cichlid aquariums (Central American or African). Seaflo™ Puka Shell substrates are great additions to fine sands in reef tanks where animals make their homes by burrowing in the substrate. Jawfish, blennies and burrowing crustaceans will especially appreciate the extra "construction material." Our substrates are purposely engineered and free of impurities such as ash, metals, pesticides, and silica; which allows you to create a safe and beautiful environment for your fish and invertebrates. Precision grading makes system design a breeze! No matter what type of system you are setting up, we have the substrate that's perfect for the filtration method and habitat you are creating.

**ARM™ Extra Coarse** - A high magnesium reactor media. ARM™ Extra Coarse is still a complete reactor media containing not only calcium and carbonate, but essential trace elements as well. ARM™ Extra Coarse contains: 275200 ppm Calcium, 590000 ppm Carbonate, 2200 ppm Strontium, and 2000 ppm Magnesium.  
1 gal. #00529 - 2/cs  
50 lb. #00559 - 1/ea

**ARM™ Coarse** - Calcium reactors have evolved into several types that require different media sizes. Because of this we now offer ARM™ Coarse for rapid upflow type reactors that have become so popular. This coarse grade of ARM™ will prevent the clogging and upkeep associated with fine media and these reactors.  
1 gal. #00525 - 2/cs  
50 lb. #00551 - 1/ea

**ARM™ Fine** - Contains nearly 50 times the strontium of other brands (7390 ppm). It also contains 381,000 ppm Calcium, 590,000 ppm Carbonate, and 1050 ppm Magnesium. ARM™ Fine has the highest solubility of any reactor media available (metastable at 8.2) so typical CO<sub>2</sub> consumption is much lower.  
1 gal. #00525 - 2/cs  
50 lb. #00555 - 1/ea

**NO-NO<sub>3</sub>™** - Nitrate troubles? Sulfur denitrification is a tried and true method that has been used for years in commercial water treatment. Current practice shows that sulfur based denitrators hold promise for significant nitrate reduction in heavily bio-loaded aquarium systems too. These biologically driven denitrator/reactors rely on a combination of pure sulfur, aragonite and sulfur reducing bacteria. NO-NO<sub>3</sub>™ is a ready to use blend of sulfur and aragonite for simple sulfur denitrification.  
1 gal. #00527 - 2/cs  
50 lb. #00557 - 1/ea

**LSM™** - Pure granular elemental sulfur, with sulfur reducing bacteria right on it for faster break in. This is the same product utilized by public aquariums for effective nitrate reduction in high bioload fish only systems. LSM™ is compatible with commercially available split level or dual chamber reactors typically used in conjunction with fine-grained calcium reactor media such as our ARM™ Fine. This method of nitrate reduction lowers nitrate and provides additional pH support.  
1 gal. #00528 - 2/cs  
50 lb. #00558 - 1/ea

**Mineral Mud™** - A unique blend of sediments that duplicate tropical fringing coastal mangrove environments. Mineral Mud™ particles are in a size range compatible with soft, burrowing infaunal, macro animal assemblages. Ideal for mud refugiums, seagrasses, macro-algae, and mangroves, Mineral Mud™ provides a variety of trace elements plus calcium, strontium, iron, sulfur and free carbon. In addition, Mineral Mud™ contains live marine bacteria to complete the tropical ecosystem.  
1 gal. #00526 - 2/cs  
50 lb. #00556 - 1/ea

**The A.R.K.™** - Aragonite Refugium Kit - Micro floras, micro faunas, and sponges can provide a valuable food source for hard to feed reef tenants such as angelfish, tangs, mandarin gobies, butterfly fish, and larger invertebrates. CaribSea's A.R.K.™ is the first complete refugium kit for marine and reef aquariums which caters to the growth of these hard to obtain, hard to produce, natural foods. Only the A.R.K.™ contains substrates from .1 mm to 125 mm long axis, creating a haven for not only denitrifying and nitrifying bacteria, but also benthic organisms such as copepods and decapods. The larger macro-pores created by the variety of calcium carbonate rubbles form a cryptic zone to encourage the growth of water purifying sponges and larger invertebrates such as shrimp, worms, and serpent stars. Also inside, a 5 lb bag of CaribSea's Mineral Mud™ to be used around Caulerpa, Halimeda, and other macro-algae plantings or anchors. The A.R.K.™ also contains a 4 ounce bottle of Purple Up™, the only patented coralline algae accelerator, and an 8 ounce bottle of Aquabiotic™ to aid in the start up of necessary water purifying bacteria. You will also find an 80 gallon dose of Bio-Magnet™, which clarifies water and places bacteria within the substrate and filter media as needed. CONTENTS: (all in 5 gallon bucket) 40 lbs of Arag-Alive!™ Bahamas Oolite aragonite sand, .1-1.0 mm. ; 10 lb. of natural calcium carbonate rubble 25+mm; 5 lb. of Mineral Mud™; 1- 8 ounce Aquabiotic™; 1- 4 ounce Purple-Up™; 2- 40 lb. dose packs of Bio-Magnet™. 5 gallon bucket #00560

**Primo Reef Rock** - The ultimate rock for marine, reef, or African Cichlid ecosystems. Packed with holes and textures, and incredibly porous, you can't get any better rock than this! It has great color too, not too white, not too dark, and takes coralline algae growth beautifully. The free forms lock together nicely for stability, and because its natural rock, each piece is uniquely yours. Forget the plastic stuff! Nothing tops mother nature, and nothing tops new Primo Reef Rock!  
40 lb. box #00365

**Texas Holey Rock** - Howdy partner! In order to bring you the holiest rocks we could find, our posse from CaribSea went hunting down in Texas. This rock is so holey you would think we emptied both of our six-guns into each piece. We often have show pieces available (18 inches and larger), they are a limited availability item; please call for current inventory.  
40 lb. box #00320  
18 inch+ #01380/pound

**Reef Rock** - A great addition to fish or reef tanks. Actual petrified coral! Reef Rock retains excellent coral texture and is ideal for use as an economical base rock on which to attach invertebrates such as anemones, soft and hard corals, etc. Clean and pure, not bleached or chemical treated.  
50 lb. box #00350  
5-6 lb. Net bag 00306

**South Seas Base Rock** - Natural weathering processes form the fantastic shapes of South Seas Base Rock by the erosion and pitting of limestone over the course of eons. It is clean and safe for marine, reef and hard water freshwater aquariums such as African cichlids. South Seas Base Rock can also be an interesting and realistic addition to a desert reptile biome.  
40 lb. box #00370  
500 lb. pallet #00373  
1000 lb. pallet #00374  
10 lb. Net bag 00372

**Super Naturals™ Rock Stars** - Carrying a full line of freshwater rocks has never been easier with new Super Naturals™ Rocks Stars from CaribSea. All your favorites like Salt and Pepper Granite and Red Lava, and a few soon to be favorites too like Kahuna Black Lava, and Alien Eggs that glow in the dark! There are nine choices in all. So stop struggling with scales at the counter, and send your customer home with the quality and selection you expect from CaribSea. We make it easy to rock on.... For those who like classic rock (or to rock it "old school"), we do offer 25 lb. bulk boxes too.

# Care Sheet

Our new website will be launching soon, with all new information and over 100 species care sheets like the one you see here to your right.

**REDFIN FAIRY WRASSE** *Cirrhilabrus rubripinnis*  
(Red Parrot Wrasse, Philippine Flame Wrasse)

**MAXIMUM LENGTH:** 3.1 in. (8 cm)  
**NATIVE HABITAT:** West Pacific  
**MINIMUM AQUARIUM SIZE:** 30 gal. (114 L)  
**FEEDING:** Feed meaty foods, preferably several times a day.  
**OVERVIEW:** While often overlooked, the Redfin Fairy Wrasse is a striking and interesting aquarium inhabitant.  
**HABITAT:** Reef or sand-rubble habitat. Provide with plenty of hiding places, as well as open swimming space.  
**COMPATIBILITY:** This lovely wrasse is rarely troublesome in the community tank. On occasion, males may scrap with other smaller, red fishes (e.g., cardinalfishes), but this squabbles rarely end in injury. It will quarrel with the similar fairy wrasses (e.g., *Cirrhilabrus rubriventralis*). This wrasse may be bullied by damsels, large damsels, angels, and hawkfishes. The males, which have a high, sail-like dorsal fin and blue on the throat and longer pelvic fins, should be kept one per tank. They can be housed with one or more females in a larger tank. In cramped quarters they are likely to chase and pester females incessantly.  
**AQUARIUM BEHAVIOR:** An active fish that will swim just over the substrate and pick food from the water column. It is a jumper, so keep the aquarium top covered.

## A note to our dealers...

Pick one of these 4 items below, and we will send it to you for nothing! Yup, that's right FREE. This is a limited time offer for qualified dealers. How do you get in on this? Well, it's easy. Send us an email with your name, company name, shipping address, and your primary distributors name/s. We will do the rest! This is a no obligation, limited time offer, and yes again, it's the real deal! Why are you still reading this, pick something and shoot us an email! Send this email to: [therealdeal@caribsea.com](mailto:therealdeal@caribsea.com).

**Coco Fresh™ Intro Pack** - This pack contains twelve 4 qt. bags, twelve 10 qt. bags, and one 60 qt. store use bag. This is THE solution for small animal keepers. This all natural product (details are on the inside cover) controls odor better than the perfumed junk that everyone else sells. How confident are we of that claim? Well, we are offering you free product, 'nuff said!
